

EDUCATIONAL EXCURSIONS IN THE GREAT OUTDOORS

Le parc Découverte nature de Baldwin, is now able to take reservations for scholastic groups eager to discover the ecology and environment of fish.

This educational outing includes an introduction to sport fishing, a study of the fauna and flora of the marsh, a guided tour of the fishes' reproductive cycle at the fish hatchery, and a visit to the exhibit "Fish Tales".

Tour guides and educational material are available to help prepare for the visit, and can be taken on the tour. This material can also be useful for a review of the discoveries and lessons learned as a result of the visit.
